

Smart City

Enter Now!

Smart Citizen App

A smart city is an urban area comprises of integrated monitor and management system of various sectors like traffic and transportation systems, power plants, water supply networks, waste management, law enforcement, information systems, schools, libraries, hospitals, and other community services.

Smart cities provide a sustainable environment to implement efficient systems that process information for the use of smart citizens.

Smart Garbage Collection

Increase in the population and the essence of comfortable living gave a tremendous growth in the urban areas which results in the generation of huge amount of solid wastes.

Improper disposal mechanism leads to pollute the land, water and air. To avoid such a situation and to improve the cleaning, smart garbage collector is proposed.

Smart Traffic Signals

Smart traffic lights or Intelligent traffic lights are a vehicle traffic control system that combines traditional traffic lights with an array of sensors and artificial intelligence to intelligently route vehicle and pedestrian traffic. They can form part of a bigger intelligent transport system.

Smart Car Parking

The smart car parking system is an adjustment of mechanical, electrical and control devices which can assure parking a large number of cars in a little space in a systematic and automatic way with proper direction

Smart Railway Station

A smart railway station is a station area that uses different types of electronic Internet of things (IOT) sensors to collect data and using that data to better improve efficiency, mobility and sustainability. It mainly includes. smart management, smart infrastructure, and smart mobility.

Smart Security Gates

Smart Security Gate System, an advent of the common place global to the Automated worldwide. It reduces human intervention and the man-made mistakes. Bringing automation in Societies has a primary advantage that is:

Smart **CCTV Camera**

Smart cameras (the security cameras and baby monitors used to monitor activity in and around your house) usually connect to the internet using your home Wi-Fi. This means you can watch a live camera feed, receive alerts when you're out and about, and sometimes record footage.

Smart Led Hoarding

Communicating and delivering information is a must in our fast and dynamic society. However, traditional advertising techniques and media have become outdated, less effective and even slow when confronted with the speed of data consuming habits of the average consumer. Effective advertising must be adapted to this fast-paced society by implementing new technologies.
